1	anonymous	All in all is great. It's the posting time is not US time so ppl can watch live. However, the course materials were beyond fulfilling and very easy to grasp.
2	anonymous	Keep up the good work, especially as it focuses on amateurs like us with respect to subject matters. Consider a Zoom lecture where we can hear and also ask questions.
3	anonymous	Everything was great .

6. Please suggest topics or ideas related to cancer that FST could try in the future?

3 Responses

ID ↑	Name	Responses
1	anonymous	Preventive care. Symptoms. Diets to avoid. Diets that are cancer friendly. Positive stories about people who healed completely and are cancer free. I humbly think that those ideas will make the course more attractive to general public to navigate. Best of luck!
2	anonymous	Habits that may contribute to having cancer besides hereditary
3	anonymous	I don't have any topic at the moment.
